ZIMPERIUM 5.0
Defining Enterprise Mobile Security

The only purpose-built platform designed to meet the needs of security-savvy enterprises.

Introducing Zimperium 5.0

Zimperium solutions, collectively known as the Zimperium 5.0, allow customers to detect and prevent more mobile threats, with less organizational friction, than any alternative. Zimperium's on-device, machine learning-based detection of mobile threats and enterprise-class capabilities are unmatched.

z9:
Zimperium 5.0's
Machine Learning Core
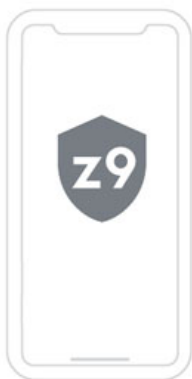

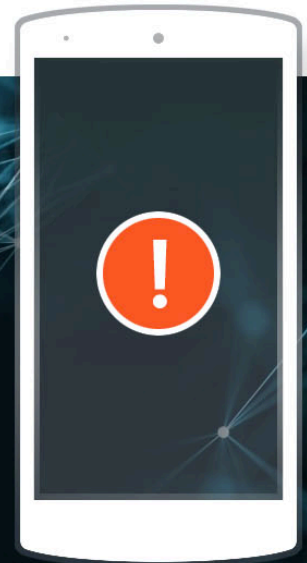

Over the last 5 years, Zimperium's machine learning-based engine, z9, has detected 100 percent of zero-day mobile exploits without requiring an update. In addition to its proven efficacy against zero-day device and network attacks, z9 is the only machine learning-based engine capable of detecting previously unknown mobile malware on-device without requiring updates and without the risks of cloud-based lookups.

Zimperium 5.0 Integrated Solutions

Zimperium's award-winning Zimperium 5.0 is the only purpose-built solution designed to meet enterprise mobile security needs. Leveraging z9 for on-device detection, Zimperium 5.0 includes four key solutions that provide significant enterprise value and are highly differentiated.

On-device, Machine Learning-Based Detection
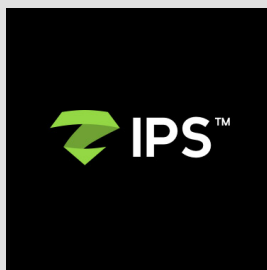

zIPS
Zimperium's stand-alone app that provides persistent, on-device protection for mobile devices and data in a manner analogous to next-generation antivirus on traditional endpoints.

zIAP
Zimperium's software development kit (SDK) that quickly embeds z9 into any mobile app, immediately protecting the app and all of its sessions from attacks.
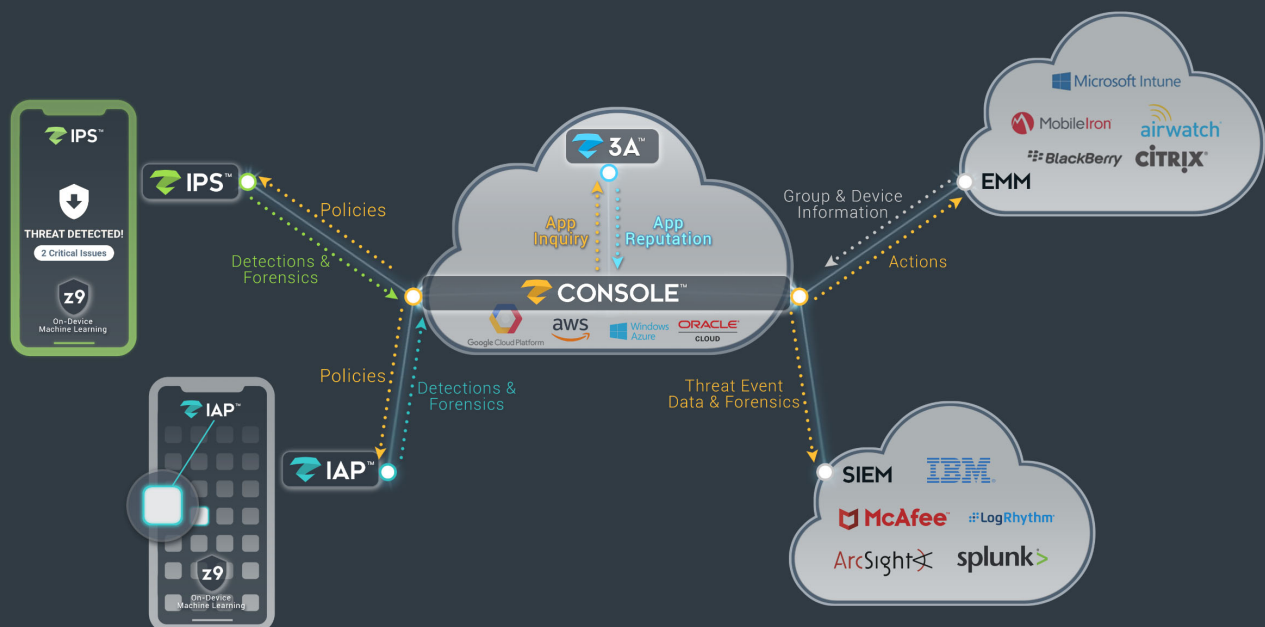

Cloud-based Management and Reporting

zConsole
Zimperium's management and reporting console, including threat forensics, policy administration and industry-leading integrations with EMM and SIEM solutions.
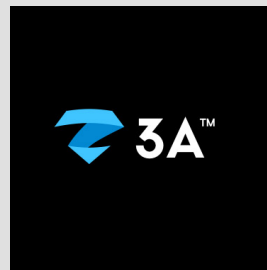

z3A
Zimperium's reporting and analytics tool that provides detailed privacy and security risk for every app on protected devices.

Why Are Enterprises Choosing Zimperium 5.0?

Enterprises and government agencies around the world continue to select Zimperium 5.0 in record numbers because of its clear and significant security and operational benefits.

Optimal Security and Privacy

Detection of the most mobile threats	Protects against zero-day threats	Real-time on-device detection
Highlights privacy and security risks in apps	Provides enterprise-grade forensics	Provides the best privacy protection

Enterprise Scalability and Flexibility

Flexible deployment options	Availability on any cloud	Tightly integrates with your EMM solutions
Easily integrates with your SIEM solution	Easily tailored to existing groups	Proven ability to scale

Zimperium machine learning-based detection protects mobile devices around the world, and it can protect yours too.
